Dual Language in Higher Education: Creating Infrastructures for Academic Support and Growth

The session presents how the dual language model has been strengthened across multiple campuses by following the higher education Dual Language Principles. The discussion includes how guided self-assessments, professional learning communities, academic leadership teams, external guided support, and professional development create infrastructures for academic support and growth among students, faculty, staff, and campus leadership for an effective dual language program in higher education.

Participants: Researchers, Administrators, Higher Education Educators, College Preparedness Educators High School Educators, Community Leaders, Parents
